

Neuron BioIndustrial is the division of Neuron BPh, a biotech company located in Granada (Spain), which specializes in the development of bioprocesses and has a pilot plant for the culture and recovery of micro-organisms.

NEURON BPh is looking for an industrial engineer for the management and maintenance of pre-industrial equipment in its **BioIndustrial** division (ref. RMBP).

Requirements:

- Technical industrial or naval engineering.
- Experience in industrial maintenance.
- A wide technical knowledge of different equipment (boilers, coolers, chillers, compressors, etc.).
- Work experience in companies with similar equipment for a period of at least two years.
- A good level of spoken and written English.

Work profile:

- Preparation of a maintenance plan.
- Equipment maintenance activities in laboratories and the pilot plant.
- Supervision of the equipment maintenance by the contracted official services.
- Energetic optimisation of the company's activities.
- Collaboration in equipment selection and pilot plants according to production and maintenance criteria.
- Reception of new equipment and facilities.

We offer:

- Incorporation into a fast-growing company.
- Integration in a young team within an environment of scientific excellence.
- Access to modern equipment allied to the most advanced technology.
- Competitive salary.
